

FRIDAY.....APRIL 11, 1879.

SENATOR JONES will start for this Coast shortly.

SHARON and Woodburn are said to be candidates for Senator next year.

E. A. SCOTT has resumed charge of the Battle Mountain Messenger, and we again take an interest in that paper.

The Central Railroad Company have advanced rates on barley and wool shipped from San Francisco to the East.

The total State and county tax on the one hundred dollars taxable property, in Lander county, for the year 1879, is fixed at \$2.25.

The Republican success in Ohio operates as a damper upon Thurman's Presidential aspirations. Tilden stock rises accordingly.

PRESIDENT HAYES will stand by the Republicans in the fight now going on in Congress. No Republican member thinks of concession.

THE work of putting in a sub-drain in the Suro Tunnel is being pushed with great energy. All the men that can be used to advantage are now employed.

THE Commissioners of Eureka county have revised and reduced their tax levy, and the rate is put down to \$1.75. So Eureka will carry off the palm for the lowest rate.

THERE are fourteen ex-Governors in the Senate—Messrs. Anthony, Booth, Burnside, Coke, Garland, Groome, Grover, Hamlin, Hampton, Harris, Houston, Kellogg, Kirkwood and Vance.

THE Gaming law, passed by the last Legislature provides that three-quarters of the money collected for license shall be paid into the county treasury, the remaining one quarter into the State treasury.

THE Gold Hill agency of the Bank of California was closed last Monday. The reason given for this step is that there is not sufficient business in Gold Hill to warrant the managers in keeping the establishment open.

THE people cannot be deceived by the Democratic stories that the great negro exodus is a Republican colonization scheme. The treatment they have received at the hands of the barbarous whites is but bearing its legitimate fruit. The colonization story deceives no one.

OFFICIAL returns show that the majority of gold miners in British Columbia are Chinamen. The total engaged in mining last year was 1,883, of whom 1,086 were Chinese. Comment is unnecessary. The Chinese mean to capture the Pacific slope.

It may have been a slip of the tongue when Ben Hill called it a Confederate Congress, but to the patriots who stood by the State and Stripes in the dark days of the Rebellion, it is a terrible truth. Every day but makes it more evident that they have taken up their work just where they laid it down in 1861 to succeed.

THE Tilden wave is booming in New York, the pivotal State. Despite the Oregon fizzle, the cipher expose, the forgetfulness of Sommy, Nephew Pelton et al, the fraudulent tax returns—the Tilden stock is booming. Let her boom. The Republicans need nothing more to ensure success than his nomination. The crafty Gramercy Parkite will doubtless foist himself upon the party.

APOSTLE CANNON, who fills the office of Congressional Delegate from Utah, took high ground on the question of polygamy at the Mormon Church conference. It was his religion, and he would advise his own daughters to contract polygamous marriages. Considering the decision of the Supreme Court and the law of Congress, this is rather extraordinary speech to make. Is Utah above the law? Time will show.

DEMOCRATS LOSE GROUND.—According to a Washington correspondent, Ex-Senator Barnum, Chairman of the National Democratic Committee, expresses to his friends his belief that forcing the extra session was a most unfortunate blunder, and that in the debate which thus far has taken place the Democrats have suffered severely before the country. He even goes so far as to say that in his opinion the session and the debate already had, will cost the Democrats a million votes. He sees no prospect of the party recovering ground as the session goes on. On the contrary he admits nothing can be said which will better the situation. No doubt but his views are shared by a number of prominent Democrats.

SHERMAN'S STATEMENT.

The New York Herald "interviewer" has been at work upon Secretary Sherman, and that gentleman unburdened himself freely. Within the last six months he has sold \$350,000,000 of the four per cent. bonds, and thereby acquired the means of redeeming the same amount of the five-twenty six per cent. bonds, a change which will save the government seven millions a year in interest. Mr. Sherman expects to complete the conversion of the five-twenties into four per cent. bonds before July 1, and perhaps within the present month. This is an achievement which reflects the highest credit on Secretary Sherman's management of this great department. The efficient preparations which, about a year ago, he began to make for resumption, the perfect success of the experiment, the smoothness of the transition and the wonderful rapidity with which he has since been able to dispose of the four per cent. bonds, mark Mr. Sherman's administration of the Treasury Department as one of the most brilliant and successful in the history of the government. That of Hamilton and that of Chase are the only ones that can be compared with it, and it would be difficult to say in what respect it is inferior to either. Mr. Sherman is not yet able to express any positive opinion as to the rapidity with which the new ten dollar funding certificates will be sold, but if the sale should be rapid he will use the proceeds for the redemption of the ten-forty five per cent. bonds, of which there are two hundred millions outstanding. Otherwise he will redeem them more gradually within the two ensuing years.

The Secretary is beginning to be hopeful that the silver dispute may be compromised on a safe basis and that the national bank question may be postponed. He thinks a hundred million silver dollars or more could be safely coined if their bullion value were equalized with that of gold dollars, and that it would be wise to postpone legislation respecting the national banks until 1883, when the first bank charter expires. He deprecates this "infernal sectional controversy," and would prefer to have the election of Representatives entirely separated from State elections and conducted by federal officers.

ONE RESULT.

A gentleman interested figures that, if the new California Constitution is adopted, \$18.48 is the net average dividend which residents of Sacramento city would receive on their deposits in the Sacramento banks, against \$54 received now.

Thus the average net rate of dividends to Sacramento city depositors would be reduced from 8.15 per cent to 3.45 per cent.

In the Hibernia Bank the average dividend each depositor would receive would be reduced from \$54.75 to \$42.13. Further, each depositor would be taxed on the "credit" he had created by depositing his money in the bank. A tax of 1 1/2 per cent on \$782.14, the average value of such "credits," would be \$11.69. This sum deducted from \$42.13 would leave a balance of \$30.44, which would be the average net dividend which depositors in the Hibernia Bank would receive on their deposits, against \$54.75 received now. Thus the rate of dividends on deposits would be reduced from 7 per cent to 3.7-10 per cent.

"DELAY" DAMAGES.

We notice that the Supreme Court, in its decisions lately, has been awarding ten per cent. damages to the right party, where it appears to have been the disposition of the appealing party to have taken a case to the Supreme Court simply to delay the judgment of the lower court from being enforced. When captions litigants find that "delay" damages will be added, we rather think the calendar of the higher court will not be as large as usual. It may have been the past custom of the Court to add "delay" damages, but it has attracted our attention lately only, and we like it so well we are constrained to speak of it at this time.

THE BEST MAN.

There are but three active candidates so far on the Republican side for Governor John F. Swift, of San Francisco; George S. Evans, of San Joaquin, and Geo. D. Perkins, of San Francisco. Mr. Perkins would command the largest vote, and is, without doubt, the best man for the position.—(Stock Exchange.) Mr. Perkins would be a Governor worthy of the great State of California. He is honest and competent, a true friend of the people, yet conservative, a Senator whose record was without a blemish, a merchant whose integrity is not doubted, and a gentleman of intelligence and culture; we should like to see him Governor of California.

It required special venires aggregating 200 jurors before a jury could be secured in the Olive murder case now on trial in Omaha. This is the case where two respectable farmers were burned at the stake as cattle thieves.

COAST ITEMS.

Dutch Flat is overrun with young tramps.

Mackerel are caught in quantities near Monterey.

A bathing establishment is to be built at Martinez.

A movement is on foot at Los Angeles to secure the establishment there, by the Southern California Methodist Conference, of a college and theological seminary. Liberal grants of land have been offered.

The Central Pacific will establish a ferry between South Vallejo and a point midway between the two tunnels below Bull Valley, Contra Costa county. The steamer Amador will be placed on the route.

On the 7th, Joaquin Serrano, a night watchman on the Monterey and Salinas Valley Railroad, when placing his revolver on a shelf at home accidentally discharged it, the bullet severing the arteries of the heart, causing instant death. He was twenty-five years of age, and much respected.

THE CARRIAGE TRICK.

[Chambers Journal.]

A certain builder of carriages made a practice of keeping a carriage on hand to palm off on the executors of deceased noblemen. It was a costly vehicle, handsomely fitted up. As soon as the death of a nobleman occurred, the carriage was decorated with the arms of the deceased in the best style of herald painting. With this preparation a letter was dispatched to the would be executor to remove the carriage which had been built according to the orders of his lordship. It had been some time ready to be taken away, and the price was £190, or some such sum. This unpleasant announcement usually led to a compromise. The carriage not being wanted, a sum of money was paid by the executors to take it off their hands. This was precisely what they anticipated. The carriage was now ready for a fresh start in plundering. The armorial bearings were obliterated; and the panels were prepared to receive the heraldic blazonry of the next nobleman on whose executors the same trick could be played off. Very clever this; but, like all rogues, it was at length found out, and a loss of reputation ensued. What became of the carriage that had undergone so many transformations we know not.

PROFESSOR KING'S BALLOON PROJECTS.—The New York Herald prints a communication from Professor King, the balloonist, in which he claims to have overcome the hitherto insuperable difficulty of sustaining a balloon at a great altitude against the loss of lifting power by leakage, increase of weight by absorption of atmospheric moisture, by contraction at a low temperature, gradual loss of ballast, etc. He proposes to attempt in due season to cross the Atlantic in the air. He says his invention and plans have the approval of a number of gentlemen of ample means, and he has funds at command to proceed. He intends to establish works at Manhattan beach, where already he has secured a site. He will build shops, gas works and construct two balloons, 165 in diameter each, with which to make captive ascensions with a cable of 1,000 feet.

SIERRA NEVADA.—The streak or feeder of ore found in the bottom of the incline of the Sierra Nevada mine is growing richer as it is followed down. Ore taken from it yesterday by President Skae showed much free gold, streaks of black sulphuret of silver, with some tinge of ruby silver in places. An assay of what was supposed to be an average taken from the streak showed over \$1,700, principally in gold. Had selected specimens been assayed they would probably have gone well up in the thousands. The feeder is but three or four inches in width as yet. It pitches to the East, but at a much sharper angle than does the incline or the lode, therefore must soon pass down into the main ore body. Should the main ore body prove to be made of the same kind of stuff as this feeder the stockholders will have no cause to complain when the crosscuts are run.—[Enterprise 9th.]

NOTICE.

IN THE DISTRICT COURT, SECOND JUDICIAL DISTRICT, State of Nevada, county of Washoe.—In the matter of the estate of W. E. BIDDLEMAN, deceased.

It appearing to the Judge of said Court by the petition presented and filed by Julia W. Biddleman, Administratrix of the estate of W. E. BIDDLEMAN, deceased, praying for an order of sale of real estate, that it is necessary to sell some portion of the said estate to pay the debts, expenses and charges of administration: And it further appearing to the said Judge, by the said petition, that it is for the best interests of the said estate of W. E. Biddleman, deceased, and for the best interests of the minor heirs and widow of the said deceased, that an order be made to wit: on the 24 day of September, A. D. 1878, made by this Court, directing the said Administratrix to sell certain real estate therein mentioned and described as "Truckee River at Clark's station," be revoked and annulled: It is therefore ordered by the Judge of this Court that all persons interested in the estate of said deceased appear before the said District Court, on SATURDAY, the 10th day of MAY, 1879, at 10 o'clock in the forenoon of said day, at the Court room of said District Court at the Court House in Reno, Washoe county, Nevada to show cause why an order should not be granted to the said Administratrix to sell so much of the real estate of the said deceased as shall be necessary, and, further, to show cause why an order should not be granted to the said Administratrix revoking and annulling the said order heretofore granted on the 24 day of September, A. D. 1878, heretofore: And that a copy of this order be published at least four successive weeks in the Reno Journal, a newspaper published in said Washoe county. S. D. KING, District Judge.

A LONDON MYSTERY.

A London correspondent of the Chicago Times amuses his readers with the history of a great equestrienne who can ride horses which no man in England can ride. She has been a great rider since her youth. An orphan of respectable parentage, obliged to support herself, the avenues of a livelihood that opened before such a young girl as she, in the crowded, elbowing life of England, were few and unpromising.

THE PLANET MARS.

Prof. Lockyer is of the opinion that human life on the planet Mars may be very much like human life on the earth. The light cannot be so bright, but the organs of sight may be so much more susceptible as to make the vision quite as good. The heat is probably less, as the polar snows certainly extend further, but by no means less in proportion to the lessened power of the solar rays.

THE STOCK MARKET.—The S. F. Post says:

- 1. Dullness and an unsettled feeling until the defeat of the new Constitution is assured.
- 2. A booming market to be made on the defeat of the Constitution.
- 3. Another advance when the Sauto tunnel drains the flooded mines—probably in June.
- 4. A big excitement and booming prices when the lower levels of Sierra Nevada are opened—July, August.

CAPITAL AFRAID.—The following Washington item is significant to California people just now:

Ex-Representative Luttrell has been detained here for the last month attending to business connected with the interests of his constituents. Among other things he was employed by some parties in California to negotiate \$300,000 to be invested in his district. He says he made the necessary arrangements, but that the capitalists now decline to invest any money in California, and have to-day emphatically informed him that in their deliberate judgment not a dollar of Eastern capital will be invested in California until the proposed new Constitution is defeated.

JUST HOW AND WHY NERO FIDDLER.—

Nero fiddled while Rome was burning. And when we go behind the returns, we discover that Nero was what the lamented Aeternus Ward would call a "sagacious cuss." He had been so frequently disturbed and threatened with death by the neighbors, whilst playing "Baby Mine," "Whoa, Emma," at home, that he determined to have a nice quiet time with his fiddle at least once, without interruption.
